

News: Armor Gold Cables : New Armor Gold Instrument Cables

Posted by [Harmony Central News](#) Jul 27, 2010

Armor Gold Cables is now offering Premium USA Handmade Instrument cables with Right Angle ends in 10 and 20 foot lengths.

These cables offer the same proven components and solid design as our award winning instrument cables featuring a Polymer outer mesh, G&H Show Saver Plugs, and double-layer heat shrink. We use medium-low capacitance wire for great tone. Yes, different cables do sound different... super-low capacitance (below 30 pf) can sound too trebly and harsh, while higher capacitance (over 40 pf) cables can sound dull and lifeless. We hit the sweet spot at 33 pf for that elusive combination of warmth with clarity!

All of these features combine for an incredibly durable, quiet, flexible, and affordable cable that sounds great. Plus we provide the confidence of a Lifetime Warranty and a 60 Day "no questions asked" trial.
